

## CREATE AN OASIS IN YOUR HOME TODAY!

Whether it's a Koi/lily pond shower, tropical reef bathtub surround, dog track floor, a marsh scene backsplash, leaf fireplace, floral medallion, or a memorial tile for a loved one, Tiles with Style can create a tile masterpiece to fill your heart's desire. **EVERY order is 100% custom, hand cut; not molded.**

We can also create a mosaic using our tile in conjunction with stone, coral, and other natural materials. A beautiful shower floor with trout can be created with rock pebbles, or if you prefer a beach, we can use coral and sand dollars. We offer endless possibilities.

## HANDMADE MOSAIC CERAMIC TILES FOR ENDLESS POSSIBILITIES.

## WELCOME!

Founded in 1999, **Tiles with Style** is a decorative ceramic tile studio that is owned by master tile artist, Diane H. Holycross. We specialize in custom, handmade, **shaped**, (mosaic) decorative tiles and are well known for quality craftsmanship, elegant designs, and fully custom colorations. Our purpose is to create a unique work of art, ornament, and architecture in your next ceramic tile installation.

All of our tiles are **100% custom made at the time of your order**, per your specifications; not the tile manufacturing industry. This means any design existing or new, can be ANY color, ANY size/configuration, and ANY shape. Just send us paint swatches, wallpaper, pieces of your field tiles, or granite countertop, and we'll create a beautiful, color-coordinated work of functional art for your home; yes home, not house, because bringing a bit of the outdoors indoors can make your house a home.

## FILM MOUNTED

To ease your cost of installation and receive a beautiful artist layout, choose our film mounted tile

installation system. For more details, click **Film Mounted Tiles** in the right column, on any page of our website.

## FULLY VITRIFIED

A tile that is "vitrified" is considered "glass-like." It has been processed in such a way that it has extremely low porosity and water absorption properties making it stain resistant and very strong. Having these qualities make our porcelain/earthenware-based tiles *frost-free* and suitable for fireplace exteriors.

Vitrified tiles have superior mechanical strength, which makes them appropriate for indoor and outdoor installations.

Most wall tiles, Mexican clay tiles, and decorative painted square tiles are **not** vitrified. Tiles that are not vitrified can absorb water over time and possibly breakdown. **Our tiles are engineered to last for generations to come.**

## QUALITY

You won't find better quality for the price anywhere. Just look at the detail put into each piece of our tiles. We use real vegetation to create our leaf tiles. This enables us to produce a very realistic tile. Even our Koi tiles have scales. And, our wavy water tiles around the Koi make them appear to move in the pond.

## MONOCHROME DESIGNS

A timeless, mosaic tile design that looks wonderful with natural stones such as granite, marble, and travertine. It looks wonderful with traditional and modern décor.
